Art Unit: 2632

1. The patent number associated with parent application 10/052,427 should be inserted on page 1 of the specification in the appropriate place.

2. Claims 12-20 are objected to under 37 CFR 1.75(a) for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12, the recitation starting on line 2 would be clearer if commas were inserted after "tracked" (line 2) and after "thereto" (line 3).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 31-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 31, lines 7 and 15, the use of the term "one" in the associated recitations is unclear as to whether this term refers back to "codes", "set", etc (e.g. on line 6), and/or whether this term refers ahead to "a plurality of" objects, or to each individual object in the "plurality" (e.g. on line 7). It appears that the associated recitations would be clearer by inserting a comma after "codes" (lines 6 and 15), and by inserting --each of-- after "for" (lines 7 and 15), such that the associated recitations would read "...identification codes, one for each of at least a plurality of...".

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2632

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-40 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6, 8-16, 19-26, 28-39 and 41-44 of U.S. Patent No. 6,801,245. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are basically equivalent except for broadening the recitation about the image (or partial image) being used to determine identification codes for "each of" the plurality (or multiplicity) of objects in the patent claims, to the image (or partial image) being used to determine identification codes for "a plurality of" (or "at least a plurality of") the multiplicity of objects in the application claims.

7. No rejection of the claims under 35 U.S.C. 102 or 103 is considered appropriate at this time.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Skinger (US 5698833), Goldberg (US 6526158), Reynolds et al (US 6286763) and Belka et al (US 6142375) were cited in the parent application.
